## EDUCATION

**2021 - 2024**

**CHHATTISGARH SWAMI VIVEKANAND UNIVERCITY**

Diploma In Computer Science Engineering

**2024 - Present**

Bachelor of Engineering

**CHHATTISGARH SWAMI VIVEKANAND UNIVERCITY**

## PROFESSIONAL SUMMARY

Full Stack Web & Mobile Application Developer with 3 years of experience building scalable, responsive, and user-focused applications for Web, Android, and iOS. Experienced in developing healthcare, hospitality, restaurant, and business applications using React, React Native, TypeScript, JavaScript, Next.js, Node.js, Express.js, and MongoDB.

Skilled in transforming business requirements into production-ready applications, developing complete user workflows, integrating REST APIs, authentication, form validation, state management, and backend services, and delivering smooth cross-platform experiences.

Strong problem-solving and debugging skills with hands-on experience working across frontend, mobile, and backend development, collaborating with teams, and delivering reliable applications from development to production.

CORE TECHNOLOGIES

React | React Native | TypeScript | JavaScript | Next.js | Node.js | Express.js | MongoDB | HTML5 | Tailwind CSS | Flutter | Android | iOS

## HOBBIES & INTERESTS

- Movies & Entertainment — Big fan of Marvel and superhero films
- Cooking
- Dancing
- Singing
- Photography

## SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

## WORK EXPERIENCE

**Sthanave Technologies**

2023 - PRESENT

Software Engineer

- Plan, design, and implement frontend features and user interfaces that align with the company's product goals and user experience objectives.
- Lead, mentor, and collaborate with a team of frontend developers, fostering a productive and innovative development environment.
- Ensure UI/UX consistency and code quality across all web and app interfaces.

### Techonet

2024

Internship – Web Development

- Assist in planning and implementing frontend features and website updates, ensuring alignment with project goals.
- Support the development team in writing clean, efficient, and responsive code.
- Conduct research on UI/UX trends, tools, and technologies to improve website functionality and user experience.
- Help maintain consistency in design and functionality across web pages and applications.

### Freelance Healthcare Project

React Native Developer | 3 Months

- Developed web applications using React, Next.js, TypeScript, JavaScript, and Tailwind CSS.
- Developed cross-platform Android and iOS applications using React Native.
- Worked on Doctor & Patient healthcare applications for a healthcare agency, contributing to both mobile workflows and healthcare-related features.
- Developed and maintained hospitality and restaurant applications, including digital menu and restaurant management functionality.
- Integrated REST APIs and worked with backend services using Node.js and Express.js.
- Implemented authentication, user profiles, forms, API integration, state management, and responsive UI.
- Worked with MongoDB for application data and backend integration.
- Collaborated directly with clients to understand requirements, suggest solutions, and deliver features.
- Handled debugging, testing, performance optimization, and production support.
- Worked across the complete development lifecycle from requirement gathering → development → testing → deployment.

## News & Blogs Web Platform

Duration: January 2025 to march 2025
Technologies: Next js
Role: :Frontend Developer
Description: A web application for reading and managing news articles and blog posts, featuring a responsive user-facing site and an admin dashboard for content management, both built using React.

### Roles & Responsibilities

- Developed responsive user interfaces for the news and blogs website, ensuring smooth navigation and readability.
- Built the admin dashboard in React for managing articles, categories, user comments, and analytics.
- Implemented features like article creation, editing, deletion, and approval workflows for admin users.
- Integrated frontend with backend APIs to fetch and display dynamic content in real time.
- Ensured consistent design, UI/UX quality, and performance across devices and browsers.
- Used libraries and tools like React Router, Toast notifications, and state management (Redux/Context API) for better interactivity and workflow.
- Collaborated with a team of developers, participating in Scrum planning and daily standups.
- Tested and optimized the application for performance, responsiveness, and maintainability.

## Live Menu Web & Mobile App for Restaurants

Duration: July 2025 to present
Technologies: React js , React native , Movement js
Role: Frontend Developer
Description: A web and mobile application that provides restaurants with a live, interactive menu featuring real photos, visual comparisons, and up-to-date dish-level insights to enhance customer trust and engagement.

### Roles & Responsibilities

- Developed responsive and interactive web interfaces for live menus and detailed dish information.
- Built and maintained cross-platform mobile applications using React Native for Android and iOS.
- Integrated REST APIs to fetch and display dynamic menu and application data.
- Ensured responsive design, visual consistency, and usability across different devices and screen sizes.
- Collaborated with a team of 8 developers in an Agile/Scrum environment, participating in sprint planning and daily stand-ups.
- Translated business requirements into intuitive and user-friendly application interfaces.
- Performed application testing, debugging, and issue resolution to ensure reliable functionality.
- Deployed and supported web applications through cPanel hosting and mobile applications on relevant platforms.

## Doctor & Patient Healthcare Mobile Application

| | |
|---|---|
| Duration | june 2026 to August 2026 |
| Technologies | React, React native , Redux , node |
| Role | Fjsu ll stack Developer |

Description: A healthcare mobile application designed for doctors and patients, providing a smooth digital healthcare experience. The application supports separate doctor and patient workflows, allowing patients to manage their healthcare journey while doctors can manage appointments, schedules, patient information, and related activities.

Roles & Responsibilities

- Developed cross-platform Android and iOS mobile applications using React Native.
- Worked on both Doctor and Patient modules, implementing role-based workflows and user experiences.
- Developed patient registration, login, profile management, and authentication functionality.
- Implemented doctor profiles, availability, scheduling, and appointment management features.
- Developed patient-side flows for finding doctors, viewing doctor information, and managing appointments.
- Integrated REST APIs for authentication, user data, doctor/patient information, appointments, and other application features.
- Implemented form validation and handled different application states and API responses.
- Built responsive and reusable UI components for a consistent experience across Android and iOS.
- Worked on notifications and important user updates to improve communication between doctors and patients.
- Collaborated with backend developers and the product team to understand requirements and implement healthcare workflows.
- Tested and debugged the application to improve performance, stability, and user experience.
- Participated in development, testing, bug fixing, and production-release activities.
